

DWA_08 Discussion Questions

In this module you will continue with your “Book Connect” codebase, and further iterate on your abstractions. You will be required to create an encapsulated abstraction of the book preview by means of a single factory function. If you are up for it you can also encapsulate other aspects of the app into their own abstractions.

To prepare for your session with your coach, please answer the following questions. Then download this document as a PDF and include it in the repository with your code.

1. What parts of encapsulating your logic were easy?

- The easy parts were implementing the encapsulated factory function into my Main.js file and making the book preview work.

2. What parts of encapsulating your logic were hard?

- The hard part was trying to encapsulate the factory function in a way That made it easy to understand and use.

3. Is abstracting the book preview a good or bad idea? Why?

- I would say that it is a good idea because it makes the code more modular and readable.
